John L. Hofmann

August 3, 1983

WTC - SUMMARY OF SAMPLING LOCATIONS AND TEST RESULTS FOR  
AIRBORNE ASBESTOS

Memo, H. Pool to D. Censullo, same subject, dated 7/28/82

W. Connell, D. Censullo, J. Navas, C. Vasquez

Refer To	Date	Noted By	Initials

*FILE  
ASBESTOS*

Attached for your reference are the updated summary sheets which show the 1983 test locations and test results of our airborne asbestos monitoring program. The samples, except for the otherwise indicated locations, were obtained in the northeast and southwest quadrants of each floor. All samples were obtained in the plenum area above the hung ceiling.

In all areas tested, it should be noted that the airborne fibers are considerably less than those permitted by federal standards, namely, two fibers per cubic centimeter of air.

If you have any questions concerning the summary sheets or the monitoring program we will be happy to discuss them with you.
